Wigner $W(x,p)$ vs Husimi $Q(x,p)$ — Jaynes–Cummings ($\bar{n} = 10$)
$t = 0$
$t = 0.5\,t_c$
$t = 2\,t_c$
$t = t_r/2$ (cat)
$t = 0.75\,t_r$
$t = t_r$ (revival)
$\delta = -0.000$
$\delta = 0.019$
$\delta = 0.563$
$\delta = 0.851$
$\delta = 0.644$
$\delta = 0.306$
$Q \geq 0$ always
Wigner $W(x,p)$
Husimi $Q(\alpha)$
